Devcation Delhi 2026 is a **premier hackathon** bringing together **passionate developers and problem-solvers** for an electrifying journey of creativity and technology. Organized by **Google Developer Groups IGDTUW** in collaboration with **GDG IIT Delhi**, the event offers a **dynamic platform to build impactful, real-world solutions**.

The journey culminates in an exciting **Grand Finale at IIT Delhi** on **12th April 2026**, where the **best ideas take center stage**. 🚀

The hackathon features **four exciting and diverse tracks** designed to cater to different domains of innovation :

- **TigerGraph Track**
- **Hack 'N' Solve (Open Innovation)**
- **Sustainability Track**
- **Duality Track**

ROUNDS

Round 1 : Mandatory Registration Task

Participants are required to **complete the mandatory form** to officially secure their spot in the hackathon. **All team members irrespective of the track need to submit this form. These are tasks required by the sponsors, we need numbers!**

Link to the Mandatory Task : https://forms.gle/nNuA4GM5tf2JSUW89

Timeline: March 15 – April 1
Mode of Conduct: Online
Note: This round is **compulsory for all participants**.

Round 2 : Submission Round

In this round, teams will work on their ideas and are required to **submit their project details** through the provided form. Submissions must include a **PPT, GitHub repository link, and demo video (optional) of the project**, which will be used for **evaluation and shortlisting** for the next stage. Strong, well-structured submissions will increase the chances of moving forward in the competition.

Timeline: April 2 – April 4
Mode of Conduct: Online
Note: All mandatory fields must be filled for the submission to be considered for evaluation. This is an eliminatory round.

Participants can structure their PPT to include: problem, solution, architecture, tech stack, demo, and results. There is no fixed template, clarity and presentation quality matter most.

Round 3 : Mentorship Round

Shortlisted teams will receive mentorship from experts. This is an **eliminatory round**, and teams will be evaluated based on their **progress and implementation to advance to the finale.**

Timeline: April 5 – April 7
Mode of Conduct: Online through Google Meets

Round 4 : 🏁 Grand Finale at IIT Delhi

A total of 20 teams will present at IITD, including 5 teams from the TigerGraph track and 15 teams from other tracks.

🏆 The best teams will be recognized and rewarded for their outstanding performance.

Timeline: April 12 (11:00 AM – 6:00 PM)
Mode of Conduct: Offline at IIT Delhi

TRACKS

TigerGraph Track (Premium Track):

A track where participants build solutions using TigerGraph Database, and related technologies, competing for exclusive cash prizes.

🏆 **Number of Winners: 2 Teams** (1st and 2nd Place)
💰 **Cash Prizes:** 1st Place (24,000) and 2nd Place (12,000)

Detailed documentation about the track for participants' reference :
https://alluring-beryllium-491.notion.site/TigerGraph-Devcation-Hack-N-Solve-2026-32ec2cb129c081e59d8ec16ab55dc23e

Connect with the Tiger graph Team for doubts: Devanshu Saxena, Devrel
Connect with me for advice: https://calendly.com/devanshu-saxena-tigergraph/20min
WhatsApp me directly: https://wa.me/917404313376

Note : The entire judging & mentorship procedure will be carried out online for the participants in this track. The 2 winners will be announced and felicitated at IITD!

Hack 'N' Solve (Open Innovation Track)

The **Hack 'N' Solve track** is the **open innovation category** of Devcation Delhi 2026, designed for participants who want the **freedom to build across any domain**. Whether it's **FinTech, Healthcare, AI, Web3, EdTech, or Social Impact**, this track encourages you to identify real-world problems and craft **innovative, scalable solutions**. **Hardware entries are allowed!**

Participants will be evaluated on **creativity, feasibility, technical implementation, and real-world impact**, making it a highly competitive and exciting track.

🏆 **Number of Winners: 3 Teams** (1st, 2nd and 3rd Place)
💰 **Cash Prizes:** 1st Place (20,000), 2nd Place (12,000) and 3rd Place (8,000)

This track is all about **innovation without limits** — if you have a bold idea, this is where you bring it to life! 💡

Sustainability Track

The **Sustainability Track**, powered by **Rotaract Club IGDTUW**, is focused on building **technology-driven solutions for environmental and social impact**. This track invites participants to tackle pressing global challenges such as climate change, waste management, clean energy, sustainable cities, and social well-being.

🏆 **Number of Winners: 1 Team** (1st Place)
💰 **Cash Prizes:** 6,000

Duality AI Track (Offroad Semantic Segmentation)

The **Duality AI Track** is a **specialized AI/ML-focused track** that challenges participants to work on **semantic segmentation for off-road autonomy** using **synthetic data generated from Duality AI's digital twin platform, Falcon**. In this track, participants will train machine learning models on annotated desert environment images and test them on new, unseen environments, simulating real-world deployment challenges.

Detailed documentation about the track for participants' reference :
https://drive.google.com/file/d/101fNFPoXQBswM95OcOrS-fOunYz9ej5k/view

Participants will focus on:

- Training and fine-tuning a **semantic segmentation model**
- Evaluating performance using metrics like **IoU (Intersection over Union)**
- Optimizing models for **accuracy, generalizability, and efficiency**
- Documenting workflows and presenting insights with **clear analysis and visualizations**

Key Deliverables which if included can get you **Brownie points** in your evaluation :

- A **fully trained segmentation model** with code and configurations
- A **detailed performance report** including IoU scores, loss graphs and failure analysis
- Proper **documentation and presentation** of the complete workflow

🏆 **Number of Winners: 1 Team** (1st Place)
💰 **Cash Prizes:** 10,000

This track is perfect for participants interested in **AI, Computer Vision, and autonomous systems**, offering hands-on experience with industry-level tools and real-world problem settings. It's not just about building a model—it's about building one that can adapt, generalize, and perform in challenging environments.

FAQs

Participants & Eligibility

Can I participate in the Hack 'N' Solve track without using TigerGraph?
Yes, you can participate without using TigerGraph. **TigerGraph is only compulsory for the TigerGraph track.**

Can I participate individually?
Yes, you can participate individually. The **team size can range from 1 to 4 members**, and participants can be from **different colleges or even different countries**.

Can I form a team with participants from different colleges or from different years?
Yes, you can form a team with participants from **different colleges, years, or even locations**. There are **no restrictions on team composition**.

Problem Statements

When will the track problem statements be released?
The problem statements will be released around March 25th. Stay tuned for updates!

TigerGraph & MCP

Do I have to use MCP or can I use TigerGraph directly?
You can use **TigerGraph directly**, but using **MCP is recommended** for better integration and workflow.

What screenshot do I need to upload?
You need to upload a **screenshot of the Docker image in Docker** as proof of downloading TigerGraph.

Judging & Participation

Are there any restrictions on who can participate together?
No, there are **no restrictions**. Anyone can team up together.

Will there be a resume shortlist?
No, there will be **no resume-based shortlisting**. Participants will be judged purely on their **idea, technology, and innovation**.

Registration & Submission

Do we need to select a track now?
No, you just need to register on Unstop and fill the Google form for now. Track selection will happen later during the submission of PPTs.
